

PVA TePla AG: Incoming orders boosted by 44% relative to previous year

Aßlar, 21.01.05: In fiscal 2004, PVA TePla AG substantially increased its volume of incoming orders to achieve a record volume of € 55 million (preliminary figure after consolidation). This equates to a 44% improvement compared to the previous year (€ 38.1 million). Generating € 32 million in orders (2003: € 21.0 million), the Vacuum Systems division was a major contributor to this boost in volume. The basis for this success lies in the continuous development of the various model series. A particularly encouraging aspect is that the additional orders were globally distributed among different regions of the world and came from a variety of high-tech industries. In addition to the persistently strong market position in China, orders were also logged in Russia, Poland, India and France. The Plasma Systems division generated a further € 18 million (2003: € 15.0 million) in incoming orders for the Group, improving on the previous year's figure by 19%.
