Siltronic Samsung Wafer places order for delivery of crystal growing systems

(Aßlar, November 30, 2006) – The Crystal Growing division of PVA TePla AG, Aßlar, has received on November 30 an order for the delivery of crystal growing systems worth around EUR 60 million from the Singapore-based Siltronic Samsung Wafer Pte. Ltd., a joint venture between Siltronic AG, Germany, and Samsung Electronic Corp., Ltd, Korea.

The EKZ 3000/450 systems will be delivered to the joint venture for the first set-up stage in the course of 2007 and 2008. Both companies had previously entered into advance negotiations to order crystal growing systems in a letter of intent. Information on this was provided in an ad hoc report dated July 24, 2006.

The order was included in the company planning announced on the previous day.
