

Dividend strategy of PVA TePla AG

The current dividend policy of PVA TePla AG aims to sustainably increase shareholder value through strategic investments in future growth.

PVA TePla AG is currently in a dynamic growth phase. We are focusing on strategically expanding our market position, developing innovative products, and sustainably strengthening our operational performance. To achieve these goals, we are making targeted investments in key areas such as research and development, building and expanding our organization, tapping into new markets, and strategic acquisitions.

Against this backdrop, our dividend policy is currently geared toward reinvestment rather than distribution. The Executive Board and Supervisory Board of PVA TePla AG have therefore jointly decided to refrain from distributing a dividend in the medium term.
