Press Release

Wettenberg, March 28, 2014

PVA TePla and Hind High Vacuum (HHV), India, Agree To Strategic Cooperation

- Marketing, assembly and service of PVA TePla heat-treatment systems for the Indian market
- Production of selected modules for PVA TePla in India
- Marketing and joint developments of vacuum furnaces for special brazing and hardening processes

PVA TePla AG, based in Wettenberg (Germany) and Hind High Vacuum Co. (P) Ltd, based in Peenya, Bangalore (India), both leading manufacturers of systems for vacuum and heat treatment of high-tech materials, have entered into a strategic cooperation agreement. As part of this collaboration, HHV – a family-owned company founded in 1967 and India's leading vacuum technology provider and vacuum furnace manufacturer – will market PVA TePla systems in India and finish selected systems for the Indian market at its site, will also provide related services.

PVA TePla has agreed with HHV on marketing existing system concepts for special brazing and metallurgical processes globally and enhancing them for applications in the aviation industry, among others.
